## EXPERIENCE

### Full Stack Developer

Princess MOA

08/2017 Sofia, Bulgaria

I had the opportunity to learn from some of the best people in the industry and for about 2 years I have come a long way in my professional carrier path.

- I have worked extensively almost from the beginning on building an app for a furniture management system with Angular
- the following project was with react and node.js, and it was about a small social network for the company's personnel and it went really good

### Front-end designer

Smartwary.bg

03/2018 Sofia, Bulgaria

Redesigning dvetelepti.com was my assignment on this charity related website. My part of the project was to make every page mobile-friendly as it was already done for the desktop version.

- the header and the menu were simplified and adapted for mobile
- for mobile, the carousel was replaced with displaying each category instead
- added grid gallery on the homepage and new design for login page
- user profile, campaigns, single campaign and additional tweaks for all pages were made for mobile

## EDUCATION

### JavaScript Web Developer

SoftUni

2017 - 2019 Sofia, Bulgaria

I have successfully completed the whole curriculum of JS developer at SoftUni and those are some of the most notable courses.
